PART TO MASS  
PRODUCTION

For almost 50 years, our family business, which has grown into a group on a human scale, is a **recognised partner** in the industrial subcontracting sector.

Our companies are **complementary** and **all specialised** in specific services of **preparation, treatment and surface finishing**.

We guarantee an optimum level of service in line with your **customised finishing** requirements for highly technical parts.

- Excellence of our know-how and recognised expertise
- Experiences and skills of our employees
- Diversity and complementarity of our services
- Impeccable finishing quality and responsiveness

The parts we process come from machining, cutting, stamping, foundry, heat or surface treatment, grinding...

## COMPLETE CUSTOMISED FINISHING SOLUTIONS

## FIVE POLES OF SKILLS AT YOUR SERVICE

**Gouvernon**  
— LA FINITION SUR-MESURE —  
Solutions globales

**Deburring, Micro blasting, Brightening, Edge contouring, Roughening, Descaling, Superfinishing, Supercalendering, Stripping, Polishing, Surface cleaning, Surface improvement.**

The perfect mastery of our processes in unit or barrel blasting, shot-blasting, and tribofinishing, allows us to offer a wide range of finishings.

- Machine park of more than 100 units, wide range of abrasives,
- Competence of our teams, very short lead times, homogeneity of series, batch reproducibility,
- From pieces of a few millimetres to pieces larger than 2 metres.

**Netotec**  
— GROUPE GOUVERNON —  
Solutions propreté  
des pièces industrielles

**Cleaning, Degreasing**

Processes for all types of machined parts, carried out on automated vacuum equipment, meeting the latest environmental standards.

- Standard or specific baskets,
- Different degreasing phases with adjustable temperatures,
- Adaptable movements: static phase - oscillation adjustable to the nearest degree - full rotation,
- Capacity up to more than a ton of parts per hour.

**Polissage**  
— GROUPE GOUVERNON —  
Solutions pour l'esthétique  
de la matière

**Emery polishing, Brushing, High gloss polishing, Mirror polishing, Brushed polishing**

Know-how in manual and semi-automatic polishing to meet technical and aesthetic finishing requirements, which can be complemented by mechanical polishing.

- On all raw metals, metals, alloys and plastics,
- For all qualities of finish and satin finish.

**AppliChrome**  
— GROUPE GOUVERNON —  
Solutions de traitements  
et revêtements des métaux

**Embellishing, protecting and improving the performance of parts through nickel and chrome plating processes.**

We specialise in the electrolytic treatment of steel and brass.

- Operations carried out exclusively at the attachment,
- Deposit thickness: Copper - approx. 1  $\mu\text{m}$  / Nickel - from 2 to 20  $\mu\text{m}$  / Chromium from 0.2 à 0.3  $\mu\text{m}$ ,
- A copper undercoat can be applied depending on the surface to be treated.

**AppliDécors**  
— GROUPE GOUVERNON —  
Solutions décoratives

**High-end personalised decoration, for professionals and private individuals. Endless possibilities for creating an atmosphere or revisiting objects.**

Our micro-blasting process reveals the decorations with a long-lasting glossy/matte effect that does not alter the material.

- For tableware, interior/exterior design, art or decorative objects, signage...
- On supports made of steel, stainless steel, aluminium, enamelled cast iron, glass, polymers.
